

## **LUNCH WORKSHOPS** (hall 113)

### **SUNDAY, 12:40**

#### **Flexible flow solutions for analysis and sorting of cells and everything smaller than cells**

*Andreas Wicovsky*

CytoFLEX family of Flow Cytometers have been known for their extraordinary sensitivity and resolution connected with ease of use and reliability. Introduction of CytoFLEX, CytoFLEX LX instrumentation. How the FLEX family can help researchers to gain their goals in an easy way leveraging linear APD detectors. Now allowing to sort cells an easy and automated way. Introduction and applications for 4-way cell sorter CytoFLEX SRT with respect to sorting of small particles.

### **MONDAY, 12:50**

#### **IVDR: implications for manufacturers and individual laboratories. Partnering for a smooth transition**

*Brice Ezzouaouy*

New regulation for medical devices so called "IVDR" has been discussed in a many clinical laboratories these days. Our experts will give overview about practical implications for laboratories and give you guidance for smooth transition.

## **MINI-WORKSHOPS** (hall 113)

### **SUNDAY, 14:35**

#### **Extracellular vesicles - key considerations and analysis of small events**

Session about instrument set up and possibilities and limitations for analysis of small particles.

## **MONDAY, 9:00, 12:10**

### **DxFLEX - flexible IVDR compliant flow cytometer - hands-on session**

CytoFLEX flow cytometers have been known for years for their reliable high sensitivity detection of dim populations as well as small particles analysis (e.g., extracellular vesicles) with different laser excitation sources. This technology has entered recently also clinical environment with its addition to the family - Dx FLEX flow cytometer. Come to meet cutting edge clinical flow system!

## **MONDAY, 9:40**

### **ClearLab reagents portfolio - dried IVDR compliant assays for lymphoma and leukemia analysis**

Overview and practical session about IVDR compliant 10 color panels for Lymphoma and Leukemia analysis.

## **MONDAY, 10:20**

### **New developments in flow cytometry - from idea to a final product**

Interested to know how products are developed for flow cytometry? Meet our expert to find out recent and future developments of our company.

## **MONDAY, 11:30**

### **Kaluza/Kaluza C analysing software - introduction, questions and answers session**

Practical session, overview, and Q&A.

## **MONDAY, 15:00**

## **TUESDAY, 9:40**

### **CytoFLEX SRT - cell sorting made easy and automated - hands-on session**

CytoFLEX family of Flow Cytometers have been known for their extraordinary sensitivity and resolution connected with ease of use and

reliability. Now allowing to sort cells an easy and automated way.  
Introduction and applications for 4-way cell sorter CytoFLEX SRT.

**MONDAY, 15:40**

**Duraclone panels - dry cocktails for research flow cytometry**

Beckman Coulter has been manufacturing high quality reagents for flow cytometry for more than 30 years. Duraclone dried panels are well established and know in cytometric community for reliable clinical research applications. Come to discuss new additions to our Research and Clinical catalog.

**MONDAY, 16:20**

**TUESDAY, 10:20**

**CytoFlex family - CytoFlex and CytoFlex LX - hands-on session**

CytoFLEX flow cytometers have been known for years for their reliable high sensitivity detection of dim populations as well as small particles analysis (e.g., extracellular vesicles) with different laser excitation sources. Choice of up to 6 different excitation sources (lasers) and up to 21 fluorescence detection path, sensitive Avalanche Photo Diode Detection and more than 50 different configurations available makes this research flow cytometer perfect match for every research lab.
